

## Restaurant Protocols regarding COVID-19

To ensure Government health and safety regulations regarding Covid-19 are adhered to, the following protocols are currently in place at Les Fougères:

- \* Our Restaurant and Store are sanitized and disinfected several times a day and common surfaces and objects are sanitized and disinfected between reservations.
- \* Hand sanitizing by staff will occur before and after handling of any new objects or surfaces. Using hand sanitizer/ disinfecting stations is required by guests on entering the restaurant, and on entering and leaving the washrooms.
- \* We are presently accommodating reservations for guests from a single household only.
- \* Safe physical distancing (6') between serving staff, guests, and other staff will be maintained, or where not possible the appropriate protective equipment will be worn.
- \* Guests or staff who are not feeling well or are in quarantine due to recent travel are not permitted in the Restaurant or Store.
- \* In order to maintain safe physical distancing, tables and/or chairs cannot be moved from the position you find them in.
- \* Other measures we are following to ensure health and safety are:
  - \* an extra buffer table will generally be used close to your table to facilitate service (or self-service if you prefer) and to maintain traffic flow which respects 6' distancing.
  - \* self-serve carafes will be used for water refills and you will be asked whether you prefer to pour your own wine.
  - \* all menus/napkins will be single-use and compostable.
  - \* washrooms are available for use one person-at-a-time, please knock before entering to ensure this.

Your reservation is *very* precious to us. Please let us know if there are any changes in your plans to join us!

Thank you so much for your kind support and understanding as we travel through these challenging times together and look forward to better times ahead.
